## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 12-20, drawn to a method for forming one or more layers in a tube.

Group II, claim(s) 21-31, drawn to an apparatus for forming layers inside a tube.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: At least claim 12 is anticipated by Ishida 6003342. For example, see figure 7 of Ishida. It is deemed that feature 10 can be considered a tube. 3A does the first arranging, 9A shows the guiding and 7 has the surface that is inside the tube. It is clear that first material is arranged on the surface. 24 does the second charging. The reset of the limitations are clearly met. Since at least claim 12 is anticipated, it has no inventive concept nor a special technical feature. Therefore, the inventions fail to relate to a single general inventive concept and lack a same or corresponding special technical feature.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
